About This Manual

This manual is the complete reference guide for KBiz360, The Business Engine — the Smart Travel ERP platform used at Travkings Tours & Travels. It is designed to onboard new operations managers, accountants, branch staff, and senior leadership to the system within a 2-week familiarization period.

The document covers every module — from daily voucher entry by branch accountants to monthly P&L review by the Director. Each section is structured for both quick-reference lookup and start-to-finish reading.

How to use this manual

- New users — start with Section 1 (Executive Summary) and 2 (System Overview), then jump to the module relevant to your role using Section 4.
- Branch Accountants (Rohan, Mohan, Mujeet, Rujeet, Sujeet) — focus on Sections 4.2 (Transactions), 4.3 (Operations), 4.7 (HR Self-Service) and 10 (SOPs).
- Sughra Sayed (Sr. AE) — focus on Sections 3 (Permissions), 4.4 (Finance), 4.9 (HO Control) and 6 (Print Formats).
- Faiz Patel (Sr. FM) — full document with emphasis on 4.9 (HO Control), 4.10 (Settings) and 5 (Workflow Mapping).
- Afshin Dhanani (Director) — focus on 4.1 (Dashboards), 4.5 (Reports), 4.9 (HO Control — Group Dashboard), and 13 (Conclusion).

1. Executive Summary

1.1 Purpose of the Software

KBiz360 — The Business Engine — is a purpose-built Enterprise Resource Planning (ERP) system for Travkings Tours & Travels Pvt. Ltd., a multi-branch international travel agency operating across India and East & Central Africa. The platform unifies accounting, sales, purchasing, operations (bookings & ticketing), HR & payroll, taxation compliance, and executive reporting into a single role-controlled web application accessible from desktop, tablet, and mobile.

Built around a 6-branch entity structure (TKHO Head Office, BOM, AMD in India; NBO, DAR, FBM in Africa), KBiz360 handles multi-currency transactions (INR, USD, EUR, KES, TZS, CDF) and multi-tax-regime compliance (GST in India, VAT in Kenya/Tanzania/DR Congo) natively without third-party plug-ins.

1.2 Business Problems Solved

Pre-KBiz360 Pain Point	How KBiz360 Resolves It
Each branch ran its own spreadsheets — no consolidated view	Real-time consolidated dashboards across all 6 branches with one click
Manual GST/VAT filing across 6 entities — error-prone	Auto-prepares GSTR-1, GSTR-3B, VAT returns directly from sales vouchers
No visibility into branch-level GP per consultant or vendor	Yield analysis reports by destination, consultant, supplier built-in
Approval flow was email-based — no audit trail, easy to bypass	4-tier approval ladder (Maker → Checker → Approver → Director) with e-signature
Vendor bank account changes were a fraud vector	Vendor master locked at HO; all change attempts logged and denied
Month-end close took 12+ days due to scattered data	Period lock by 10th of next month + 100% audit queue — close in 5 days
No formal monthly Board MIS — Director got fragments	Auto-generated Group Monthly Dashboard published on 5th of every month

1.3 Main Benefits

- Single source of truth — one database, six branches, four currencies, no Excel reconciliations.
- Audit-ready by design — every voucher, every approval, every master change is timestamped and user-tagged.
- Compliance automation — GST/VAT/TDS calculations happen on voucher posting, not at month-end.
- Role-controlled access — branch accountants see only their branch; senior team sees all 6 branches.
- Real-time consolidated MIS — Director sees group P&L, top customers, cash position on a single dashboard.
- Mobile-first design — every screen works on phones for branch staff who travel.
- Multi-currency native — single voucher can have sale in USD and cost in EUR with auto INR conversion.
- HO control framework — vendor master, banking, asset procurement, and statutory filings centralized at TKHO.

1.4 Industries & Use Cases

Although purpose-built for Travkings, the underlying architecture suits any multi-branch services business with complex compliance needs:

- Travel agencies and tour operators (primary use case)
- Multi-country IATA/BSP airline ticketing operations
- DMC (Destination Management Company) hubs with international suppliers
- Multi-branch professional services firms (consultancies, audit firms)
- Multi-country trading houses with VAT/GST compliance needs

2. System Overview

2.1 Overall Workflow

KBiz360 is organized around a four-tier workflow that mirrors how a travel business actually operates: Operations originate transactions (a booking is made), Transactions get accounting entries (an invoice is raised), Finance applies controls (approvals, reconciliation, payments), and Reports surface insights (P&L, cash position, compliance). Each tier is permission-gated to a specific role.

2.2 Main Modules

Module	Purpose	Primary Users
Dashboard	Role-specific home screen with KPIs and alerts	All users
Transactions	Daily voucher entry (Receipt, Payment, Journal, Invoice, Branch AEs, Sughra	Branch AEs, Sughra
Operations	Bookings, ticketing, itinerary builder, file management	Travel consultants, Branch AEs
Finance	Bank reconciliation, TDS calculator, treasury, investments	Sughra, Faiz
Reports	P&L, GP analysis, yield reports, custom builder, scheduled reports	Sughra, Faiz, Afshin
Taxation	GST/VAT return prep, TDS certificates, e-invoice, tax calculation	Sughra, Faiz
HR & Payroll	Employee master, payroll run, self-service portal, Form 16	HR Manager, all employees
Masters	Customer, Supplier, CoA, Bank Accounts, Currency, Cost Centers	Faiz, Sughra (setup phase)
HO Control	Group dashboard, vendor lock, period lock, audit queue, Faiz, Afshin, Sughra	Faiz, Afshin, Sughra
Settings	User management, branding, doc templates, approval matrix	AD (Super Admins), Faiz

2.3 Navigation Structure

The left sidebar is organized by usage frequency — daily tasks at the top, configuration at the bottom. Sub-sections expand on click; only menu items the current user has permission to access are visible.

Order	Module	Rationale
1	Dashboard	Landing screen — role-specific KPIs load on login
2	Transactions	Daily work — vouchers posted multiple times per day
3	Operations	Daily work — booking files, itineraries
4	Finance	Back-office daily — reconciliation, TDS, treasury
5	Reports	Periodic — analytics and insights
6	Taxation	Monthly cadence — GST/VAT filings, TDS
7	HR & Payroll	Monthly cadence — payroll, leaves, self-service

Order	Module	Rationale
8	HO Control	HO finance only — group oversight
9	Masters	Configuration — touched mostly during setup
10	Assets	Quarterly — fixed asset register, depreciation
11	Settings	Admin-rare — branding, doc templates, permissions

2.4 Dashboard Explanation

Dashboards are role-specific — each of the 6 roles sees a different home screen tailored to their decisions:

Role	Dashboard Focus
Director (Afshin)	Group revenue, GP%, cash position, top customers/consultants, branch comparison
Sr. FM (Faiz)	Pending approvals, period close status, statutory dues, audit findings, treasury yield
Sr. AE (Sughra)	Approval queue, master change requests, after-hours alerts, reconciliation backlog
Accounts Exec (Branch)	My branch's voucher activity, pending approvals waiting on me, today's bookings
HR Manager	Headcount, leaves pending, payroll status, recruitment pipeline
Super Admin (AD)	System health, user activity log, security alerts, recent admin actions

3. User Roles & Permissions

3.1 Organization Structure

Travkings operates 6 entities across 4 countries with 9 active users in a 4-tier hierarchy. The system enforces branch-level isolation: branch accountants can see only their assigned branch, while the three TKHO-stationed staff (Director, Sr. FM, Sr. AE) have all-branch visibility.

3.2 Branches

Code	City	Country	Role	Currency	Tax Regime
TKHO	Head Office (Mumbai)	India	HO / Main Branch — non-revenue, control hub	INR	GST 5%/18%
BOM	Mumbai	India	Operating branch (largest)	INR	GST 5%/18%
AMD	Ahmedabad	India	Operating branch	INR	GST 5%/18%
NBO	Nairobi	Kenya	Operating branch	KES	VAT 16%
DAR	Dar es Salaam	Tanzania	Operating branch	TZS	VAT 18%
FBM	Lubumbashi	DR Congo	Operating branch	USD	VAT 16%

Group Consolidation Note

The label "Travkings Group" is used in dropdowns and reports when consolidating all 6 entities. TKHO is a non-revenue entity — it does not do sales or purchases. Its sole transactional activity is asset purchases (for centralized GST input credit) and HO running expenses.

3.3 User Hierarchy (9 users · 4 tiers)

Tier	Name	Employee ID	Role	Branches	Email
0 — System	AD	TK-SYS-001	Super Admin	ALL 6	ad@travkings.com
1 — Leadership	Afshin Dhanani	TK-TKHO-000	Director (Founder)	ALL 6	afshin@travkings.com
2 — Finance Mgmt	Faiz Patel	TK-TKHO-001	Sr. Finance Mgr (CFO-equivalent)	ALL 6	faiz.fm@travkings.com
3 — Checker	Sughra Sayed	TK-TKHO-002	Sr. Accounts Executive	ALL 6	sughra.sae@travkings.com
4 — Maker	Rohan	TK-BOM-003	Accounts Executive	BOM only	rohan@travkings.com
4 — Maker	Mohan	TK-AMD-002	Accounts Executive	AMD only	mohan@travkings.com
4 — Maker	Mujeet	TK-NBO-003	Accounts Executive	NBO only	mujeet@travkings.com
4 — Maker	Rujeet	TK-DAR-002	Accounts Executive	DAR only	rujeet@travkings.com
4 — Maker	Sujeet	TK-FBM-002	Accounts Executive	FBM only	sujeet@travkings.com

Key Structural Points

AD is the system Super Admin (not a person) — used only for system maintenance and never for transactions. All 5 branch AEs see only their assigned branch — strict branch isolation prevents cross-branch interference.

3.4 Approval Authority Matrix

The 4-tier approval ladder governs all transactional approvals. Voucher posting limits define what a user can auto-approve; approval limits define what they can approve for others.

Voucher Type	AE Post Cap	Sughra Approve	Faiz Approve ≤	Afshin (Above)
NEFT/RTGS Payment	₹0	₹2,00,000	₹10,00,000	Above ₹10L
Cash Payment	₹5,000	₹25,000	₹1,00,000	Above ₹1L
Forex Payment (USD eq.)	\$0	\$5,000	\$50,000	Above \$50K
Journal Voucher	₹0	₹50,000	₹5,00,000	Above ₹5L
Credit Note / Refund	₹0	₹25,000	₹5,00,000	Above ₹5L
Receipt Voucher	₹10,000	₹2,00,000	₹10,00,000	Any
Asset Purchase	₹0	₹0	₹2,00,000	Above ₹2L

3.5 Master-Data Change Authority

Master changes are governed separately from transactional limits because a vendor bank account change can cause more damage than a single payment voucher.

Master Change Type	Requester	Approver	Notes
New Customer / Supplier	AE / Sughra / Faiz	Sughra	After dup-check + credit check
Credit Limit ≤ ₹10L	Sughra / Faiz	Faiz	Faiz authority
Credit Limit > ₹10L	Sughra / Faiz	Afshin	Director mandatory
Vendor Bank A/c Change	Sughra only	Faiz	Highest-risk · email confirmation required
Vendor PAN/GSTIN Change	Sughra only	Faiz	Vendor consent letter needed
Chart of Accounts	Faiz only	Faiz	Quarterly review cycle
User Permissions	Faiz only	Faiz	Per spec — Faiz authority
Approval Matrix	Faiz only	Afshin	Director-only authority
Tax Code / GST Rate	Faiz only	Faiz	Statutory data

3.6 Role Access Summary

Module	Super Admin	Director	Sr. FM (Faiz)	Sr. AE (Sugra)	Branch AE	HR Mgr
Dashboard	✓ All	✓ Group	✓ Group	✓ Group	✓ Own branch	✓ HR
Transactions	✓ Full	✓ All view	✓ All branches	✓ All branches	✓ Own branch only	—
Operations	✓ Full	✓ All view	✓ All view	✓ All view	✓ Own branch only	—
Finance	✓ Full	✓ View	✓ Full	✓ Full	✓ Limited	—

4. Module-by-Module Documentation

This section covers every major module in KBiz360 with screen explanations, field guides, workflow steps, validation rules, and best practices. Each module subsection follows a consistent structure: Purpose → Key Functions → Step-by-Step Usage → Field Reference → Workflow → Validation Rules → Best Practices → Common Mistakes.

4.1 Dashboard Module

Module Path: Sidebar → Dashboard | Route: /dashboard

Purpose

The Dashboard is the home screen for every user. It loads automatically on login and routes the user to a role-specific view. The system supports 6 distinct dashboards (Director, Sr. FM, Sr. AE, Accounts Executive, HR Manager, Super Admin) — each surfacing the metrics and actions that role needs daily.

Key Functions

- Real-time KPI tiles showing today's most relevant numbers
- Pending action queue (approvals waiting on this user, alerts)
- Charts and trends (last 12 months, week-over-week comparisons)
- Quick links to most-used screens
- Branch-aware data filtering (shows only data this user can see)
- Period selector (Today / This Week / This Month / This Quarter / This Year)

Screen Reference: Director Dashboard

Section	What It Shows	Source Data
KPI Strip (top)	Group Revenue, GP%, Cash Position, Overdue Receivables	Consolidated
Branch Comparison Chart	Revenue bar chart per branch with YoY%	Monthly P&L data
Top Customers Card	Top 5 customers by revenue this month	Sales voucher data
Top Consultants Card	Top 5 consultants by GP	Booking & invoice data
Cash Position Card	Multi-currency balance with INR equivalent	Bank ledger
Statutory Dues Alert	Next 30 days filing calendar	Tax calendar module
Branch Heatmap	Performance traffic light per branch (green/amber/red)	GP% thresholds

Validation Rules

- Dashboard auto-refreshes every 5 minutes for KPI tiles
- Period selector cannot exceed 12 months for performance reasons
- Branch filter is locked to user's assigned branch(es)
- Drill-down clicks always respect the user's permission model

4.2 Transactions Module

Module Path: Sidebar → Transactions | Sub-sections: Sales · Purchase · Receipts · Payments · Journals · Voucher Tools

Purpose

The Transactions module is where 80% of daily user activity happens. Branch accountants post receipts and payments, raise customer invoices, record supplier bills, and create journal entries. Every transaction has a voucher number (format: VTYPE-BRANCH/YYYY/SEQ, e.g., PV-BOM/2026/0892) and is permanently audit-logged.

Key Functions

- Sales Vouchers — Tax Invoice, Proforma Invoice, Credit Note, Debit Note
- Purchase Vouchers — Vendor Bill, Purchase Return, Vendor Debit Note
- Receipt Vouchers — Customer receipts (cash, NEFT, RTGS, UPI, cheque)
- Payment Vouchers — Vendor payments, statutory dues, salary payments
- Journal Vouchers — Provisions, accruals, year-end adjustments
- Contra Vouchers — Bank-to-bank transfers, cash deposits/withdrawals
- Voucher Tools — Bulk Excel import, multi-currency vouchers, comments thread, print preview, auto-linked vouchers

Workflow: Payment Voucher Approval

Step	Actor	Action	Routing Rule
1	Branch AE	Post voucher	Auto-saves as Draft if > AE limit
2	System	Route to approver	By amount: Sughra ≤ ₹2L, Faiz ≤ ₹10L, Afshin > ₹10L
3	Approver	Review attachments & narration	Comments thread for clarifications
4a	Approver	Approve → routes to bank for payment	Voucher status → Approved
4b	Approver	Reject → returns to AE with reason	Voucher status → Returned
5	Bank Cell (Faiz)	Initiate NEFT/RTGS in bank portal	Voucher status → Paid
6	System	Auto-match bank statement entry	Reconciliation marked done

Voucher Tools (Sub-section)

Tool	When to Use
Bulk Voucher Import (Excel)	Posting >20 vouchers — e.g., monthly BSP settlements, batch supplier payments
Multi-Currency Voucher	Sale in USD, cost in EUR (single voucher with auto INR conversion + GP calculation)
Voucher Comments Thread	Collaborate on a voucher before approval — clarifications, attachments
Print Preview Before Saving	Review formatted voucher layout before committing
Auto-linked Vouchers	Sale ↔ Receipt and Purchase ↔ Payment automatic matching
Contra Voucher	Bank-to-bank transfers, deposits/withdrawals

4.3 Operations Module

Module Path: Sidebar → Operations | Sub-sections: Bookings · Ticketing · Itinerary · Files · Sub-agents

Purpose

Operations is where travel consultants and branch staff create bookings, issue tickets, build itineraries, and manage customer files end-to-end. Each booking file is a folder containing the customer, the trip plan, the suppliers, the financial transactions (invoice, receipt, cost vouchers), and all documents.

Workflow: From Enquiry to Booking

Step	Stage	Owner	Output
1	Enquiry received	Branch Consultant	Enquiry record
2	Quote prepared	Consultant	Quotation PDF sent
3	Customer confirms	Consultant	Booking file created
4	Advance invoice raised	Branch AE	Tax Invoice → customer
5	Advance receipt recorded	Branch AE	Receipt voucher posted
6	Supplier bookings made	Consultant	Hotel/flight/transport with confirmations
7	Cost vouchers posted	Branch AE	Payment vouchers per supplier
8	Final invoice (balance)	Branch AE	Final tax invoice
9	Final receipt	Branch AE	Receipt voucher
10	Trip executed	Customer/Consultant	Travel completion update
11	GP calculated	System (auto)	GP report updates

4.4 Finance Module

Module Path: Sidebar → Finance | Sub-sections: General Ledger · Banking · Receivables · Payables · Finance Tools

Key Sub-Sections

Sub-section	Purpose
General Ledger	View all postings · drill into any ledger account · trial balance
Banking	Bank book per account · bank reconciliation · cheque register
Receivables	Customer outstanding · ageing analysis · dunning letters
Payables	Vendor outstanding · payment due list · BSP reconciliation
Bank Balance Dashboard	Real-time balances across all 9 accounts (4 currencies, 6 branches)
TDS Auto-Calculator	Section selector, PAN check, auto-rate application, threshold check
Interest Calculator	Delayed payment interest — simple or compound, per-day granularity
Investment Register	FDs, mutual funds, GOI bonds with maturity tracking
Loan Amortization	EMI calculator with full month-by-month schedule
Reconciliation Queue	Bank transactions awaiting voucher matching with auto-match confidence

Reconciliation Match Outcomes

Confidence	Status	Action Required
90-100%	Auto-matched (green)	None — system links automatically
60-89%	Partial match (blue)	Sughra reviews and confirms
Below 60%	Pending (orange)	Manual matching — click "Match" and select voucher
No match	Pending (orange)	Create new voucher from the bank transaction

4.5 Reports Module

Module Path: Sidebar → Reports

Report Catalog

Category	Reports Included
Financial	Profit & Loss · Balance Sheet · Trial Balance · Cash Flow · Cash Position · Inter-branch Elimination · FS
Profitability	Yield by Destination · Yield by Consultant · Yield by Supplier · YoY · Customer LTV · ABC Analysis
Operational	Booking Status Summary · Pipeline · Pending Visas · Hotel Occupancy
Compliance	Statutory Dues · Tax Filing Board · Currency Exposure · TDS Register
HR	Attrition · Leave Utilization · Birthday Calendar · Headcount
Report Tools	Custom Report Builder · Saved Views · Scheduled Reports · Meta Demo (comparatives, sparklines, d

Scheduled Reports

Report	Frequency	Recipients	Format
Monthly P&L by Branch	1st of month, 07:00	Director, Sr. FM	PDF
Weekly Cash Position	Monday 08:00	Sr. FM, Sr. AE	Excel
Daily Voucher Summary	Every day 19:00	Sr. AE	PDF
Overdue Payables > 30d	Every day 09:00	Sr. FM, Sr. AE	Excel
TDS Deduction Register	7th of month 10:00	Sr. FM	Excel
GSTR Filing Reminder	18th of month 09:00	Director, Sr. FM, Sr. AE	PDF

4.6 Taxation Module

Module Path: Sidebar → Taxation | Sub-sections: GST Returns · TDS/TCS · Compliance · Auto-Prep Tools

Key Screens

Screen	Purpose
GSTR-1 Auto-Prep	Monthly outward supply return — aggregates B2B, B2C, HSN automatically
GSTR-3B Auto-Prep	Summary return with ITC calculation and tax payable
GSTR-2B Reconciliation	Match inward ITC to vendor-filed GSTR-1
Form 16A Generator	Quarterly TDS certificates per vendor with PDF download
Form 26AS Match	Reconcile our TDS deposits with traces
E-Invoice & IRN	Generate IRN for invoices >₹5 Cr threshold
VAT Return (Monthly)	For NBO, DAR, FBM entities
Tax Calendar	All compliance dates with countdown days and reminders
TDS / TCS Register	All TDS deducted/collected with section-wise summary

4.7 HR & Payroll Module

Module Path: Sidebar → HR & Payroll | Sub-sections: People · Payroll · Expense & Loans · Self-Service

Payroll Cycle

Date	Step	Owner
25th of month	Attendance cutoff for current month	HR Manager
26th-27th	Run Salary Calculation (gross, deductions, net)	HR Manager
28th	Review and approve salary register	Faiz Patel
29th	Generate bank transfer file (NEFT batch)	HR Manager
1st of next month	Salary credited to employee accounts	Bank (auto)
1st of next month	Payslips published to Self-Service Portal	System (auto)
7th of next month	PF, ESI, PT challans generated and paid	Sughra Sayed

Self-Service Functions (per employee)

Function	What Employee Can Do
Leave Application	Apply for leave with date picker, balance check, manager approval routing
Reimbursement Claim	Submit expense claims with line items, attach receipts, track approval
My Payslip	View and download monthly payslip in PDF (last 12 months)
Investment Declaration	Submit IT investment declaration (80C, 80D, HRA, LTA, etc.)
Form 16	Download annual salary certificate (after FY ends)
Performance Review	Submit self-assessment for annual review
360° Feedback	Give/receive anonymous feedback to/from peers and seniors
Skill Matrix	View current skill assessment vs target levels

4.8 Masters Module

Module Path: Sidebar → Masters

Master Catalog

Master	Records	Maintained By	Change Authority
Customer Master	~250 active customers	Sughra/AE	Sughra approves
Supplier Master	~180 active suppliers	Sughra/AE	Sughra approves; bank a/c → Faiz
Sub-Agent Master	~40 sub-agents	Sughra	Faiz approves
Airlines & GDSs	~80 airlines	Sughra	Faiz approves
Hotels & DMCs	~120 properties	Sughra/AE	Sughra approves
Chart of Accounts	~450 ledgers	Faiz	Faiz approves; quarterly review
Bank Accounts	9 accounts	Faiz	Faiz approves; signatory → Afshin
Currency Master	9 currencies with daily rates	Faiz	Auto-updated from RBI feed
Cost Centers	10 hierarchical centers	Faiz	Faiz approves
Projects (Tour Packages)	~50 packages	Sughra	Sughra approves
Document Types	10 templates	Faiz	Faiz approves
Numbering Series	18 series	Faiz	Faiz approves; locked once active
Approval Limits	14+ rules	Faiz/Afshin	Afshin approves
Tax / SAC Codes	Statutory codes	Faiz	Faiz approves

4.9 HO Control Center

Module Path: Sidebar → HO Control | Visible to: Director, Sr. FM, Sr. AE, Super Admin only

Sub-sections

Sub-section	Screens
Authority & Approvals	Authority Configuration Center · Master Change Request Queue · Vacation Delegations
Asset & Procurement	Asset Procurement Workflow
Master Data Control	Vendor Master Lock · Banking Relationship Control
Compliance & Audit	Statutory Filing Register · Period Lock Control · Central Audit Queue (100%)
(Top-level)	Group Monthly Dashboard

Authority Configuration Center — 5 Tabs

Tab	What It Configures
A · Transactional Limits	Edit voucher post limits and approval caps per role per voucher type
C · Master Data Permissions	Checkboxes for who can request and who can approve each master change
D · Branch Isolation	Cross-branch posting audit tag, inter-branch journal routing, consolidated report access
E · Time-Based Controls	Period soft-lock day (10th), hard-lock (30 days), dual-control threshold (₹10L)
Delegations	Vacation back-up authority — active and historical delegations

Period Lock Discipline

After the 10th of each month, prior-month periods auto soft-lock. After 30 days, they hard-lock. This forces month-end discipline and prevents retro-active P&L manipulation.

4.10 Settings Module

Module Path: Sidebar → Settings

Settings Sub-sections

Sub-section	Screens
Organization	Company Settings · Branches · Departments · Fiscal Calendar
Users & Roles	Users · Roles · Permissions Matrix · Bulk User Operations · Field-Level Access Control
Approvals	Approval Matrix Builder · Approval Limits
Templates	Document Template Editor · Email/SMS Templates · Custom Fields Manager
Numbering & IDs	Numbering Series · Document IDs
Notifications	Email Server · SMS Gateway · Notification Rules
Integrations	Bank API connections · GST portal · IATA BSP · Payment gateways
Branding	Logo · Brand Colors · Letterhead · Footer
Backup & Security	Backup schedule · Audit log retention · Password policy · 2FA

5. Business Workflow Mapping

5.1 Lead to Invoice

Stage	Owner	Output / Document
Enquiry	Branch Consultant	Enquiry record in CRM
Quotation	Branch Consultant	Quotation PDF emailed
Confirmation	Customer	Booking File created
Advance Invoice	Branch AE	Tax Invoice #1
Advance Receipt	Branch AE	Receipt Voucher
Supplier Bookings	Branch Consultant	Vendor confirmations attached
Cost Vouchers	Branch AE	Payment vouchers per supplier
Final Invoice	Branch AE	Tax Invoice #2
Final Receipt	Branch AE	Receipt Voucher
Trip Execution	Customer / Consultant	Travel completion update
File Close	Branch AE	File marked Closed; GP locked

5.2 Month-End Close Workflow

Day	Activity	Owner
Last day of month	All vouchers must be posted for the month	All branch AEs
1st of next month	Sughra runs audit queue review for closing month	Sughra Sayed
2nd	Bank reconciliation completed for all 9 accounts	Sughra Sayed
3rd	Provisions and accruals posted	Sughra Sayed
4th	Sughra signs off on closing trial balance	Sughra → Faiz
5th	Group Monthly Dashboard auto-published and emailed	System / Faiz
7th	PF, ESI challans + TDS deposited	Sughra Sayed
10th	Period soft-locks automatically	System
11th	GSTR-1 prepared and filed for 3 Indian entities	Sughra Sayed
18th	GSTR-3B filed for 3 Indian entities	Sughra Sayed
20th	VAT returns filed for 3 African entities	Faiz Patel
End of next month	Period hard-locks	System

6. Invoice & Print Formats

KBiz360 supports 10+ standardized print formats. All formats use the centrally-configured branding (logo, colors, fonts) from Settings → Branding so changes propagate automatically. Each format has a Print Preview before saving so users can verify before committing.

Print Format	Purpose
Tax Invoice	Statutory tax invoice for customer billing — GST/VAT compliant
Payment Voucher	Internal record of outgoing payment for audit and signature
Receipt Voucher	Acknowledge customer payment received
Quotation	Pre-sale document showing pricing to customer
Purchase Order	Authorize supplier to deliver goods/services
Hotel Voucher	Confirmation document for guest to present at hotel check-in
Visa Cover Letter	Cover letter for visa application stating purpose and sponsorship
Payslip	Monthly salary statement for employee
Form 16	Annual TDS certificate for employees (Section 203 of IT Act)
Form 16A	Quarterly TDS certificate to vendors

Tax Invoice — Sections

Section	Contents
Header	Company name, GSTIN, IATA, CIN, address, phone (locked from Branding settings)
Title & Number	"TAX INVOICE" + Voucher No. (e.g., INV-BOM/2026/8742) auto-generated
Date & Reference	Invoice date, Booking reference, PNR from booking file
Bill To	Customer name, address, GSTIN, contact from customer master
Line Items	Description, HSN/SAC, Qty, Unit Price, Discount, Tax Rate, Amount
Tax Summary	Taxable value, CGST, SGST, IGST per rate slab — auto-calculated
Grand Total	Sum in figures + words (Indian numbering)
Notes / Terms	Payment terms, jurisdiction, late fee from template
Signatory	For Travkings authorised signatory (digital signature optional)
Bank Details	For NEFT/RTGS payment from bank account master

7. Reports & Analytics

7.1 Available Reports

Category	Reports	Frequency
Financial	P&L · Balance Sheet · Trial Balance · Cash Flow · Cash Position · Inter-branch Reconciliation	Daily/Monthly
Profitability	Yield by Destination · Consultant · Supplier · YoY · LTV · ABC Analysis	Monthly
Operational	Booking Status · Pipeline · Pending Visas · Hotel Occupancy	Weekly
Compliance	Statutory Dues · Tax Filing Board · Currency Exposure · TDS Register	Monthly
HR	Attrition · Leave Utilization · Birthday Calendar · Headcount	Quarterly
Custom	Reports built using Custom Report Builder	As designed

7.2 Export Formats

Format	When to Use
PDF	Formal sharing — board reports, board minutes attachments, printing
Excel (.xlsx)	Further analysis, pivot tables, formula manipulation
CSV	Importing into other tools, large data exports
JSON	API integration, programmatic processing
HTML	Embedding in emails (auto-rendering for some clients)

7.3 Management Reporting Cadence

Cadence	Reports to Review	Action Owner
Daily	Cash Position · Bank Balance Dashboard · Overdue Receivables (top 10)	Subra Sayed
Weekly	Branch Pipeline · Pending Approvals · Reconciliation Backlog	Faiz Patel
Monthly	Group Monthly Dashboard · P&L by Branch · Yield reports · Statutory Dues	Faiz Afshin
Quarterly	ABC Analysis · Customer LTV · Attrition · Permissions Review	Afshin Dhanani
Annually	Year-on-Year · Audit Trail Review · Compliance Calendar Audit	External Auditor + Afshin

8. Settings & Configuration

8.1 Tax Setup

Setting	Configured At	Owner
GST Rates (5%, 12%, 18%, 28%)	Masters → Tax Codes	Faiz
HSN/SAC Codes	Masters → Tax Codes	Faiz
TDS Sections	Masters → TDS Sections	Faiz
VAT Rates (Kenya 16%, Tanzania 18%, DR Congo 16%)	Per Branch Master	Faiz
Reverse Charge Mechanism rules	Masters → RCM Rules	Faiz
Place of Supply rules	Auto-calculated based on Bill-to/Ship-to System	

8.2 Notification Settings

Event	Recipient	Channel
Voucher submitted for approval	Approver	Email + In-app
Voucher approved/rejected	Submitter	Email + In-app
Master data change request	Approver	Email + In-app
Period lock approaching	All branch users	Email
Statutory filing due in 3 days	Sr. FM + Sr. AE	Email + SMS
After-hours voucher posted	Sughra	Email next morning
Monthly Group Dashboard published	Director + Sr. FM + Audit	Email

8.3 Backup Configuration

Backup Type	Frequency	Retention	Location
Database snapshot	Every 6 hours	30 days	Cloud storage (encrypted)
Full database backup	Daily 02:00	90 days	Off-site cloud + tape
Transaction logs	Continuous	7 days	Same region
Document attachments	Daily	Indefinite	Object storage (S3/Azure Blob)
Configuration backup	On change	Indefinite	Version-controlled

9. Error Handling & Troubleshooting

9.1 Common Errors

Error Message	Why It Happens	Resolution
"Period is locked"	Trying to post to a soft/hard-locked period	Request period override from Sughra (soft) or Faiz (hard)
"Insufficient permissions"	User trying action outside their role	Contact Faiz to verify if role should have this access
"Voucher amount exceeds your position limit"	Amount above their limit	Save as draft and submit for approval
"Branch mismatch — cannot post"	Branch AE trying to post in different branch	Switch to your own branch in branch selector
"Vendor bank account is locked"	Trying to edit a locked vendor's bank account	Submit Master Data Change Request — Faiz must approve
"Debit ≠ Credit"	Journal voucher doesn't balance	Add the difference to correct ledger
"TDS calculation requires PAN"	Vendor PAN not in master	Update vendor master with PAN first
"Duplicate invoice number"	Trying to use a number already used	System auto-generates — don't manually override
"Bank account insufficient"	Payment would create negative balance	Confirm with Faiz; some banks allow overdraft
"Session expired"	30 minutes of inactivity	Re-login; no data loss (drafts auto-saved every 2 min)
"File too large to upload"	Attachment >5MB	Compress PDF; split into multiple uploads if needed
"Approval timeout"	Approver hasn't acted in 7 days	System auto-escalates to next tier

10. Standard Operating Procedures (SOP)

SOP-001 · Daily Operations (Branch AE)

Frequency: Daily, on arrival to office

- 09:00 — Login to KBiz360. Review dashboard for pending approvals, rejection notifications, today's departures.
- 09:15 — Check email/WhatsApp for customer payment confirmations, vendor bills.
- 09:30 — Post receipt vouchers for confirmed customer payments. Attach NEFT advice.
- 10:30 — Post purchase vouchers for vendor bills (verify against original booking file).
- 12:00 — Submit any vouchers requiring approval. Add clear narration and attachments.
- 14:00 — Process expense claims from team members.
- 15:00 — Run bank reconciliation queue. Confirm auto-matched, work pending items.
- 16:30 — Update booking file statuses.
- 17:30 — Review tomorrow's departures. Confirm all documents ready.
- 18:00 — Logout. Ensure all critical vouchers submitted.

SOP-002 · Month-End Closing (Sughra)

- 1st — Email all branches: 'Month-end cutoff was yesterday.'
- 1st-2nd — Run Central Audit Queue: review 100% of vouchers posted in closing month.
- 2nd — Bank reconciliation for all 9 accounts.
- 3rd — Post provisions (rent, salaries, utilities, professional fees).
- 3rd — Verify inter-branch positions balance to zero.
- 4th — Run draft trial balance. Identify anomalies.
- 4th — Sign off on closing TB. Email Faiz with summary.
- 5th — Faiz validates Group Monthly Dashboard. System auto-publishes to Board.
- 7th — PF, ESI challans + TDS deposited.
- 10th — Period auto soft-locks.
- 11th — Begin GSTR-1 preparation. 18th — Begin GSTR-3B. 20th — VAT returns.

SOP-003 · Approval Process (All approvers)

- Daily check: Login → Dashboard → Pending Approvals tile.
- Open each pending voucher. Read narration carefully.
- Check attachment: invoice/debit note must match voucher amount and party.
- Verify business sense — is this expected?
- If unclear, use Comments Thread to ask the submitter rather than reject.
- If amount is unusual, drill into Audit Trail.
- Approve OR Reject with specific reason.

- Above ₹10L: even Faiz must check with Afshin (dual-control).
- After approval, the voucher is locked — no further edits.

11. Training Guide

11.1 Beginner Training Path (Branch AE — 5 days)

Day	Topics Covered	Hands-On Exercise
Day 1	System overview, login, dashboard, navigation, sidebar	Login, customize dashboard
Day 2	Customer & Supplier Masters, viewing existing records	Search 5 customers; view detail tabs
Day 3	Receipt Voucher posting, attachments, narration	Post 10 dummy receipt vouchers
Day 4	Payment Voucher, TDS calculator, approval workflow	Post 5 payment vouchers; submit for approval
Day 5	Reports basics, drill-down, exports; self-service portal	Run P&L; apply leave; submit claim

11.2 Keyboard Shortcuts

Shortcut	Action
Ctrl + N	New voucher (context-aware based on current screen)
Ctrl + S	Save current form
Ctrl + Shift + S	Save as draft
Ctrl + P	Print preview current document
Ctrl + /	Open quick search (jump to any screen)
Ctrl + B	Switch branch (for multi-branch users)
Esc	Close current modal / cancel current action
F5	Refresh data on current screen

11.3 Tips for Faster Usage

- Use the menu search bar (top of sidebar) to jump to any screen
- Bookmark frequently-used screens in your browser
- Use Saved Report Views for reports you run regularly
- Schedule routine reports for auto-email instead of manually running
- Use Bulk Import for any operation involving >20 similar items
- Use Comments Thread on vouchers instead of email — keeps audit trail
- Always attach supporting docs at posting time — avoids rejections

12. Technical Notes

12.1 Platform Details

Aspect	Specification
Frontend	React (single-page application)
UI Components	Custom design system using brand colors (Navy #0d1326 / Gold #d4a437)
Charts	Recharts library for interactive visualizations
Icons	Lucide React icon set
Mobile Responsive	Yes — every screen adapts to phone/tablet/desktop
Authentication	Email + password + mandatory 2FA
Session Management	30-minute idle timeout with auto-save of drafts
Multi-currency	Native support for 9 currencies with daily FX rate updates

12.2 Browser & Device Support

Browser / Device	Minimum Version	Status
Google Chrome	v110 and above	Fully supported (recommended)
Microsoft Edge	v110 and above	Fully supported
Mozilla Firefox	v110 and above	Fully supported
Safari (Mac/iPhone/iPad)	v15 and above	Fully supported
Android phones	Android 10+	Fully supported (Chrome mobile)
iPhone	iOS 14+	Fully supported (Safari)
Internet Explorer	Any	NOT supported

12.3 Security Notes

- All passwords hashed using bcrypt with salt
- 2FA mandatory for all users
- HTTPS only — TLS 1.3, HSTS enforced
- Session tokens stored in httpOnly cookies
- SQL injection protection via parameterized queries
- XSS protection via output encoding and Content Security Policy
- Audit log immutable — append-only, retained 7+ years
- Role-based access control enforced at API layer
- Sensitive fields encrypted at rest (vendor bank accounts, employee PAN)

- Annual security audit by external SOC 2-qualified firm

13. Conclusion

13.1 Key Strengths of KBiz360

- Purpose-built for Travkings — every screen designed around the actual business.
- 4-tier approval hierarchy enforced everywhere — Maker → Checker → Approver → Director.
- Multi-branch and multi-currency native — handles 6 entities and 9 currencies cleanly.
- HO Control framework operationalized — TKHO actually controls and adds value.
- 100% audit coverage — every voucher reviewed by Sughra.
- Auto-compliance — GSTR-1, GSTR-3B, VAT, Form 16, Form 16A auto-prepared.
- Period-lock discipline — month-end close in 5 days, not 12+.
- Mobile-first design — branch staff work from anywhere.
- Configurable by Faiz — Authority Center, Approval Matrix, Custom Fields, Templates admin-configurable.

13.2 Best Usage Practices

- Post vouchers daily — don't batch a week's vouchers on Friday
- Use the menu search instead of clicking through 3 levels
- Always add narration that a stranger could understand
- Attach supporting docs at posting time — saves re-work
- Review the Audit Queue daily, not weekly
- Faiz: review the Authority Configuration Center quarterly
- Afshin: actually read the Group Monthly Dashboard on the 5th
- Sughra: lock periods aggressively — soft-lock on 10th, hard-lock on 30th
- All users: enable email notifications

13.3 Final Word

KBiz360 — The Business Engine — is built to be the single source of truth for Travkings' multi-branch operations. It enforces controls that prevent the most common errors (period back-dating, vendor bank-account fraud, unauthorized approvals), automates the most time-consuming tasks (compliance returns, reconciliation, reporting), and gives leadership real-time visibility into group performance.

The system will only deliver these benefits if used consistently and disciplined. Branch AEs must post daily, Sughra must audit daily, Faiz must approve promptly, Afshin must review monthly. When the rhythm is maintained, month-end close shrinks from 12 days to 5, compliance issues drop to near-zero, and the Director gets the visibility needed to make data-driven decisions.

Contact for Support

For questions or to suggest improvements:

First contact: Sughra Sayed (sughra.sae@travkings.com)

Escalation: Faiz Patel (faiz.fm@travkings.com)

System issues: AD (Super Admin) (ad@travkings.com)
